The game is great, which I have already put in a lot of hours and it is quite fun to play it brings back aspects of the anti-tom cover, but without extreme grinding from the beginning the only problem is for some parts of the gatcha game it's prices for recharging for the role is quite high and there quite a few resources get a lot after the start and is 1 too 1ratio for another conversation than that it's a fantastic game and I see my own putting in the hours and hours of the game I pre-ordered this app even though I already have an antiatom shelter, and when I opened the game it was BOMBA as literally it's much better than the previous counterpad shelter. The best part is the story that I just love the futuristic kind of atmosphere and the new face of the vaults, I'm now on lv 11 and I'm still improving everything. One thing I could suggest is a feature that attracts residents. Overall it's bop! There are times that lag so much on me that I really have to restart the app or disable my low power mode on my iPhone 6. There are times when it stops, and I don't even know why. Maybe add more in-game graphics for low-end users? (The example is on the residents card, maybe we can turn off live card animation?) Im really enjoying this game so much! Please, just like I get it, I want to play with ease and not get upset because it crashes a lot. Thanks. This is a sequel to Fallout Shelter. It was announced at the end of May 2019 and was first made available to China, Macau, Hong Kong and Taiwan. It was available to Indonesia, Malaysia, the Philippines, Singapore, South Korea and Japan on June 30, 2020, led by Gaea Mobile. [2] [3] | edit source] The concept and style of play are similar to Fallout Shelter. The player still plays the role of the guard of the vault and takes care of its prosperity, but unlike the original game, conspiracy and online battles have been added to Fallout Shelter Online. Residents can now only be acquired by land tasks. Construction is not immediate, as in Fallout Shelter, but takes some time, which can be accelerated. Resources are mainly used for the development of the population. In this case, for each useful action, the administrator receives points from the vault experience. Plot[edit | edit source] The game takes place in the Community. The protagonist is the future successor of the guard of the unknown vault. Once, the supervisors left the vault for an unknown reason and took with them a device for distributing the resources of the vault, after which the successor, with the help of Secretary Jenny, became the new superintendent. The vault was recorded by Preston Garvey and Sturges, who helped improve the vault and expressed interest in assisting in the search for the guard. The purpose of the plot is to find peacekeepers and help the currently minded people revive their fighting power. After completing the main plot, the protagonist travels to the capital of the Wasteland to help Harold and Hannibal Hamlin in the fight against the slaver and enclave.
